

# FLUKE®

## More tools for HVAC professionals.

Get the job done faster and more accurately with Fluke HVAC and indoor air quality tools. From thermometers to carbon monoxide meters, Fluke offers a complete set of efficient, easy-to-use tools that save time and stretch your budget with rugged reliability that lasts.

## New Fluke clamp meter designed just for HVAC.

*Do more, carry less.* Now you can diagnose and repair HVAC electrical systems with the new Fluke 902 True-rms HVAC Clamp Meter.

- Capacitance for measuring motor start and run capacitors
- DC current to 200  $\mu$ A for flame rod testing
- Contact thermometer with k-type thermocouple for capturing flue gas temperatures
- True-rms for accurate AC voltage readings on both linear and non-linear waveforms

## More information and resources.

You can always count on Fluke for the troubleshooting techniques, application information, and training to keep HVAC systems up and running and your business growing.
