## End Date Extended Service Support

To whom it may concern,

Fluke Calibration announces some important dates regarding the end of the extended service support period for calibrators and standards and general purpose tools that have been discontinued recently. As known Fluke Calibration offers extended service and support for five years after discontinuation of a product. After the extended support period has passed, Fluke will continue to support these discontinued product with routine calibration however repair of those instruments will be limited to existing parts availability. The models and their extended support period end dates are listed in the tables below.

| Calibrators & Standards                            |                                     |
|--|-------------------------------------|
| Fluke Model  | End Date of Extended Support Period |
| 6100A Series Electrical Power Standard             | Past extended support period        |
| 5520A High Performance Multi-Product Calibrator    | December 31, 2016                   |
| 5820A Oscilloscope Calibrator                      | December 31, 2017                   |
| 7001 10-Volt Solid-State DC Voltage Reference      | February 1, 2017                    |
| 5700A Series I Multifunction Calibrator (pre-1995) | December 1, 2017                    |
| 9100 Universal Calibration System                  | December 1, 2017                    |
| 5500A High Performance Multi-Product Calibrator    | May 24, 2018                        |
| 9640A and 9640NLPNX Series RF Reference Source     | February 15, 2020                   |
| 5700 & 5720A Series II Multifunction Calibrator    | December 31, 2019                   |
| 5790A AC Measurement Standard                      | July 31, 2020                       |

| General Purpose Tools                          |                                  |
|--|----------------------------------|
| Fluke Model                                    | Extended Support Period End Date |
| 2620A/2625A Hydra Series Data Acquisition Unit | December 31, 2016                |
| 80/81 Function Pulse Generators                | February 5, 2017                 |
| 2635A Hydra Series II Data Bucket              | December 31, 2018                |
| 397 Universal Waveform Generator               | December 31, 2019                |

Fluke Calibration values your business and we are readily available to help evaluate your needs. In the event a defect "out of service" product appears not repairable due to unavailability of parts, a direct or nearest replacement model can be offered by Fluke's authorized reseller in the territory.
